Experience

Intern at Varonis Systems, New York, NY, July 2017 - August 2017

While at Varonis, I learned about the many different sectors of the company from the Sales team to the IT department. I spent a full week out of the six week internship shadowing an IT head, as well as working with other interns to carry out tasks given to us, such as making a spreadsheet to document the various laptops the company owned and what was the condition of the laptop at the time of documentation.
